Bundle Lunch	Personal Pan Pizza Veggie of the Day/Week	3 D Printing 3 D printing has already stepped into food industry, where a hospital in Netherlands has successfully 3D printed food for people with chewing difficulties. Enabling waste reduction, sustainability and handling complex textures and designs, 3D printing is already breaking grounds in food industry.		Vertical Farming With urbanization and reduction of agricultural lands, vertical farming is a boon to future food industry. One of the models of vertical farming is a farming tower where each floor including roof is used for producing crops.
